

Fire Stopping Installer Training

Overview:

The aim of this course is to “up skill” those working within the fabric of the building to ensure compartmentation and structural fire safety is not compromised during or after works have been carried out.

The course will provide technical knowledge and an introduction to Nullifire fire stopping products which can be used during the life of the building to maintain building regulations, provision of compartmentation and structural stability in the event of a fire.

Who will benefit?

The course is aimed at those involved in the specification, supply and distribution, installation, maintenance, and management of passive fire protection installations, including:

- Specialist contractors
- Facility managers
- Building owners / managers
- Site supervisors
- Fire system inspectors
- Building control officers

Learning Outcomes:

- Understand the role of passive fire protection in ensuring the safety of building and occupants
- Knowledge of the types of penetrations and areas of applications of fire stopping
- Awareness of Nullifire fire stopping products, fire ratings and effective installation

Programme:

- Introduction to fire stopping
- Primary Seals (Walls and Floors)
- Secondary Seals (Closing Devices)
- Linear Seals, Cavity Barriers and Ancillary Products

Course Duration / Location:

- 3 hours
- Online with Go to Webinar
